PROACTIVE CCTV MAINTENANCE.

Ensuring your CCTV is working when you need it most.

AUTOMATED

RAPID

LIVE STATUS

PROTECTING PEOPLE, ASSETS AND BUILDINGS.

Your CCTV systems are used to protect your people, assets, and buildings.

We want to ensure it stays that way, which is why we offer a maintenance service with a difference.

Our unique Proactive CCTV Maintenance checking service ensures your CCTV systems are operational 24/7.

By monitoring and detecting CCTV issues around the clock, and reporting them directly to your CCTV maintainers' service team, so they can be resolved before they become critical.

YOUR NUMBER ONE **SECURITY PROVIDER**

WHAT IS PROACTIVE MAINTENANCE?

Proactive CCTV Maintenance from RESS Ltd is an innovative way to ensure the operation of your CCTV systems.

By targeting systems identified with issues, we can reduce system downtime and your security risks.

HOW DOES IT WORK?

By automatically connecting to your CCTV systems remotely every hour, we are able to retrieve diagnostic and operational information.

This information is automatically analysed and issues are reported to our support team, who verify and fix them remotely. If a remote fix isn't possible, we contact your CCTV maintainer to schedule a service visit to your site.

WHY PROACTIVE MAINTENANCE?

Problems with security systems could be putting your company at risk if they are not detected and rectified in a timely manner.

Traditional annual maintenance can leave you vulnerable between service visits, and relies on someone on site to discover and report faults, often after an incident has occurred.

Proactive CCTV Maintenance checking from RESS Ltd identifies and reports issues automatically, reducing your vulnerability when systems are faulty.

By monitoring and detecting CCTV issues around the clock, and reporting them directly to your CCTV maintainers' service team, so they can be resolved before they become critical.

KEY BENEFITS.

AUTOMATED CHECKS

Scheduled maintenance routine.

RAPID RESPONSE

24/7 remote fault notification.

CUSTOMER REPORTS

Daily system status emails.

ROUTINE CHECKS
